highgain: 220–420 Hz | solver converged; strict score passed

Independent C FRF estimate
A reference-IV model

$u_1 \to y_1$ $u_2 \to y_1$ $u_3 \to y_1$ $u_4 \to y_1$

$u_1 \to y_2$ $u_2 \to y_2$ $u_3 \to y_2$ $u_4 \to y_2$

$u_1 \to y_3$ $u_2 \to y_3$ $u_3 \to y_3$ $u_4 \to y_3$

$u_1 \to y_4$ $u_2 \to y_4$ $u_3 \to y_4$ $u_4 \to y_4$

Phase (deg)

Frequency (Hz)

FRF is an independent estimate, not ground truth. All channels and frequencies retained; record units. Independently unwrapped; one constant 360° shift per curve.
