New sweeps: motor-to-sensor FRFs

Same static geometric maps for all positions; curves show separately fitted models.
Independently unwrapped; common 50 Hz branch convention; no smoothing. Each curve uses its own interpolated 50 Hz phase in [-270,90) deg.

z = -0.6 mm z = -0.3 mm z = 0 mm z = 0.5 mm z = 1 mm

$u_1 \to y_1$ $u_2 \to y_1$ $u_3 \to y_1$ $u_4 \to y_1$

$u_1 \to y_2$ $u_2 \to y_2$ $u_3 \to y_2$ $u_4 \to y_2$

$u_1 \to y_3$ $u_2 \to y_3$ $u_3 \to y_3$ $u_4 \to y_3$

$u_1 \to y_4$ $u_2 \to y_4$ $u_3 \to y_4$ $u_4 \to y_4$

Unwrapped phase (deg)

Frequency (Hz)
