logical axes, static geometry: z = 1 mm

Closed-loop sweep; static geometric maps on logical axes. Status: converged.

Independently unwrapped; common 50 Hz branch convention; no smoothing. Each curve uses its own interpolated 50 Hz phase in [-270,90) deg.

Check-segment FRF — SRIVC model

Rx → Rx | Ry → Rx | Z → Rx

Rx → Ry | Ry → Ry | Z → Ry

Rx → Z | Ry → Z | Z → Z

Unwrapped phase (deg)

Frequency (Hz)
