Before/after, z = 0 mm: logical axes, static geometry

Same position and the same static geometric maps; no temporal compensation.
Changes include all differences between the two acquisitions; frequency shifts alone do not establish a physical mode identity.

New check-segment FRF — New SRIVC model — Previous SRIVC model

Rx → Rx | Ry → Rx | Z → Rx

Rx → Ry | Ry → Ry | Z → Ry

Rx → Z | Ry → Z | Z → Z
