Before/after, z = 0 mm: motor-to-sensor FRFs

Same position and the same static geometric maps; no temporal compensation.

Changes include all differences between the two acquisitions; frequency shifts alone do not establish a physical mode identity.

New check-segment FRF | New SRIVC model | Previous SRIVC model

$u_1 \to y_1$ $u_2 \to y_1$ $u_3 \to y_1$ $u_4 \to y_1$

$u_1 \to y_2$ $u_2 \to y_2$ $u_3 \to y_2$ $u_4 \to y_2$

$u_1 \to y_3$ $u_2 \to y_3$ $u_3 \to y_3$ $u_4 \to y_3$

$u_1 \to y_4$ $u_2 \to y_4$ $u_3 \to y_4$ $u_4 \to y_4$
